

Industrial carpentry demands consistently straight cutting, smooth and even surface finish, to maintain tight design tolerances and minimize downstream processing, and uninterrupted production runs. This is why leading furniture and cabinet makers choose Munkfors bandsaw blades in their efforts to achieve smooth running, economical processing and high-quality products.

Bandsaw blades for

Carpentry

We supply high-performance bandsaw blades of different teeth configurations and manufactured from the best strip steel available to ensure they cut easily through different wood qualities and products.

12.5 x 0.50 - 4TPI | 1/2" x .020" - 4TPI

This blade is the standard choice when cutting fine surfaces. I's very suitable for precision cuts that need to have straight lines and curves.

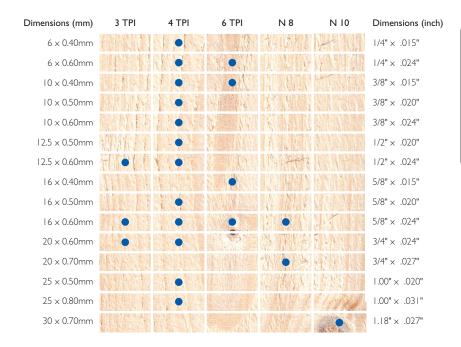

16 x 0.60 - 4TPI | 5/8" x .023" - 4TPI

Our blade with 4 teeth per inch is well-suited for general purposes. Will cut through the material quickly and create a relatively clean surface.

25 x 0.50 - 4TPI | I" x .020" - 4TPI

This blade can be used for the cutting of diferents types of woods. Are very suitable for cuts that do not need a very smooth surface, and at a higher speed.
