

Portable sawmills

Munkfors superior bandsaw blades for portable sawmills are specially engineered to ensure high and consistent results.

High and consistent end result is the key factor for all Munkfors manufactured bandsaw blades. Straight cut, less sawdust, long lifetime, re-sharpable teeth, specific adapted blade camber and tooth-setting are typical parameters that will guarantee the desired result. Our blades manage to work through all types of wood species.

Munkfors offers a comprehensive range of products that covers most requests. Our highly skilled engineers and operators have the knowledge and production ability to meet and solve all our customers demands.

Bandsaw blades for

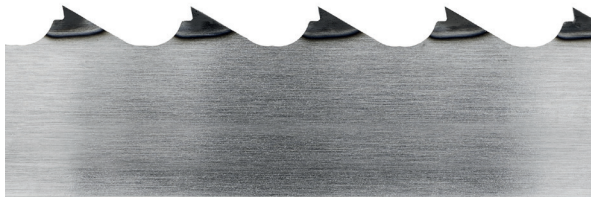

Portable sawmills

We supply high-performance bandsaw blades of different teeth configurations and manufactured from the best strip steel available to ensure they cut easily through different wood qualities.

25 x 1.05 - 19mm | 1" x .041" - 3/4"

The natural option for high volume sawing.
Also for primary and secondary breakdown.

29 x 0.90 - 19/DD | 1.14" x .035" - 3/4"DD

The best choice to remove excess of saw dust from board and wood is our DeckDuster. This improves working environment and no need for extra production process.

34 x 1.10 - 22 BiMetal | 1.1/4" x .043" - 7/8" BiMetal

Specially made for recycling where the presence of different metals such as nails are a problem.
